

Dental Accident

Claim money back, up to set limits, for dental treatment carried out as a result of accidental injury to teeth, caused by direct external impact to the head, including:

- Chipped tooth
- Tooth fractures, including root fractures, enamel fractures, etc.
- Tooth knocked loose (subluxation)
- Tooth jammed into socket (intrusion)
- Tooth knocked out (avulsion)

In the case of a dental accident, the quicker you act the more chance you have of saving your teeth

See how much you can claim on My Westfield

If you knock a tooth out:

1. Pick the tooth up by the crown only (do not touch the root)
2. Lick the tooth clean if it is dirty, or rinse it in water
3. Stick the tooth back in position (adult teeth only)

If it's not possible to put the tooth back in, put it in milk and go straight to a dentist.
